

AHMED NASR MAKLED

Flutter Developer | Cross-Platform Mobile Application Developer

Damietta, Egypt | +20 100 926 9051 | ahmed1.makled1@gmail.com

linkedin.com/in/ahmed1-makled1 | github.com/ahmed1-makled1 | ahmed1-makled1.github.io/portfolio

PROFESSIONAL SUMMARY

Flutter Developer who has architected, built, and published a live cross-platform Android app to Google Play. Delivered 50+ REST API integrations, Stripe payments, and a full Firebase backend (Auth, Firestore, Cloud Messaging) alongside real-time chat, push notifications, deep linking, and multilingual localization. Strong in layered architecture, BLoC/Cubit state management, and widget/unit/integration testing. CS & AI graduate with a competitive-programming background.

PROFESSIONAL EXPERIENCE

Cross-Platform Mobile App Developer (Flutter)

Nov 2025 – Jul 2026

Digital Egypt Pioneers Initiative (DEPI), Ministry of Communications and Information Technology

- Led a graduation-project team as lead Flutter developer, taking a mobile app from architecture design through production release.
- Built core features in Dart/Flutter, integrating REST APIs and Firebase (Authentication, data storage, real-time messaging).
- Structured the codebase with a scalable, layered architecture and BLoC/Cubit state management to keep it maintainable as features grew.

Mobile Application Developer

Jan 2026 – Feb 2026

National Telecommunication Institute (NTI), Ministry of Communications and Information Technology

- Completed 120+ hours of advanced Flutter training covering app architecture, backend integration, and state management.
- Built Flutter apps using clean, layered design while integrating Firebase services and RESTful APIs.
- Structured reusable, testable Flutter modules under instructor-reviewed development standards.

PROJECT EXPERIENCE

MARN — Smart Property Rental Platform (Graduation Project) [GitHub](#) | [Google Play](#)

Nov 2025 – Jun 2026

- Architected a production Flutter app with a layered architecture, integrating 50+ REST APIs, Stripe payments, real-time chat, push notifications, deep linking, and multilingual localization.
- Published the Android app to Google Play — a live product in active use by real customers.

eCourses — Learning Management System (LMS) [GitHub](#)

May 2026 – Jul 2026

- Led a small team building a real-time Flutter LMS with BLoC/Cubit, Firebase, and GetIt dependency injection.
- Designed role-based dashboards, live course chat, dynamic course management, and real-time progress tracking.

Spec-taco-lar — Food Recipes App [GitHub](#)

Mar 2025 – May 2025

- Built a Flutter recipe app with browsing, search, and favorites functionality.
- Designed a simple, responsive UI focused on ease of use and clear recipe presentation.

TECHNICAL SKILLS

Programming Languages: Dart, Python, C, C++

Flutter & Architecture: Flutter, Cross-Platform Development, Responsive UI, Layered Architecture, Clean Architecture, OOP

State Management & Dependency Injection: BLoC, Cubit, Provider, GetIt

APIs & App Capabilities: RESTful APIs, JSON, Stripe Payments, Localization, Deep Linking, Push Notifications, Android/iOS Deployment

Firebase & Storage: Firebase Auth, Cloud Firestore, FCM, Hive, SharedPreferences

Testing & Tools: Widget/Unit/Integration Testing, Git, GitHub, Google Play Console

Additional: Networking Fundamentals, Embedded Systems, Arduino

EDUCATION

Bachelor of Computer Science and Artificial Intelligence

July 2026

Damietta University, Egypt — Information Technology Major — Grade: Very Good

LICENSES & CERTIFICATIONS

- DEPI — Cross-Platform Mobile App Developer Certificate of Achievement — Jul 2026
- NTI — Mobile App Development Certificate of Achievement — Feb 2026
- ALX AICE — AI Career Essentials — Aug 2024
- ECPC — Egyptian Collegiate Programming Contest, Qualified, Day 2, Ranked 106th — Aug 2023
